

Pablo Carrión

Mathematician specialized in AI Agents & Generative Systems

(+34) 671742436

pablo.carrion.2000@gmail.com

Málaga (Spain)

Information

- Driver's license
- Own car
- Availability to travel

Personal Qualities

- Dedication
- Hard-working
- Strong Communication Skills
- Team Collaboration
- Responsible

Languages

Spanish	Native
English	Fluent
French	Basic

Certifications

- EY Artificial Intelligence | Analytics - Data Integration Silver Badge
- EY Data Strategy - Data Platform - Bronze Badge
- Cambridge B1 | Aptis C level (English)

Mathematician with a Master's in Big Data and Data Engineering, currently working as an AI Engineer at Indra. Specialized in Generative AI, LLM-based systems, and multi-agent architectures for enterprise environments. Experienced in designing end-to-end document processing pipelines (RAG systems), intelligent automation workflows, and AI-powered business solutions. Proficient in Python, Azure cloud services, vector databases, SQL, API integrations, and containerized deployments.

Laboral Experience

Indra (**2026 – Present**)

AI Agents Specialist - Enterprise AI Platforms. Madrid

- Google Gemini Enterprise: agent configuration, enterprise grounding, connectors to corporate data sources.
- Microsoft & AWS ecosystems: Copilot Studio, Azure AI Foundry, Amazon Bedrock — model choice, tools and knowledge bases.
- Anthropic Claude: agentic workflows, instruction and prompt design, tool integration.

EY Ernst & Young (**2024 – 2026**)

EY Wavespace Madrid

- Enterprise knowledge ingestion platform (multi-source processing): Python, FastAPI, Azure Services, OCR,
- LLMs, Neo4j, Qdrant, embeddings.
- Generative AI business chatbot (internal accelerator): RAG pipelines, vector search, knowledge graphs, contextual retrieval.
- AI proposal automation engine (document generation & personalization): LLMs, structured knowledge retrieval, automated document workflows.
- Multi-agent orchestration architecture ("agent-of-agents" framework): Python, dynamic JSON configuration, sequential agents, success criteria validation.
- Business-oriented multi-agent POCs (API simulation & secure data bridge): LLMs, FastAPI, endpoints, mock integrations, conversational workflows, intelligent automation.
- Cloud & data ecosystem: Azure, SQL, Spark, Power BI, Docker, Git.

Technical Skills

Programming Languages
Python, SQL, R, Scala, HTML

Frameworks & Libraries
Pandas, LLM frameworks (RAG pipelines, embeddings workflows)

Databases & Vector Stores
Neo4j, Qdrant,PostgreSQL, MySQL, MongoDB

DevOps, Cloud & Data Platforms
Microsoft Azure,Azure Storage
& Services, Docker

Monitoring & Logging
Grafana, Azure Monitoring,

Tools & Version Control
Git,GitLab, Postman, Docker
Desktop. VS Code

Data & AI
Machine Learning, Generative AI, Multi-Agent Architectures, OCR processing, Document Automation

APIs & Backend Development
FastAPI, API integrations, endpoint design, mock services and secure data bridges

PrivateTutor (**2020-2022**)
Independent

- High school academic Mathematics support. Exam preparation & performance improvement.

Formation

Master's Degree in Big Data and Data Engineering (**2023 – 2024**)

Bachelor's Degree in Mathematics (**2018 – 2022**)

Achievements

- **Achiever Extraordinaire – EY SPOT Award** (**2025**)**.** Recognition for dedication, perseverance and impact in AI & Data initiatives at EY.
- **Honor Mention – Academic Excellence.** Best academic record distinction at I.E.S. Pintor José María Fernández.
- **LIX Spanish Mathematical Olympiad.** Participation in national-level mathematical competition. Part of the official evaluation committee.

Volunteering

EY GDS Volunteering Festival FY26 – Environmental Sustainability Initiative.
